## Description

## Application

## Specification

## Typical Characteristics

## Product Information

### Quelle QX- Metal X Aluminium

Quelle QX – Metal X Aluminium is a high performance semi synthetic metalworking fluid which is boron, amine, chlorine and formaldehyde releasing agent free. It contains a unique additive package that works in synergy to enhance machining performance and surface finish and provide excellent product stability.

## APPLICATION

Quelle QX – Metal X Aluminium is especially designed for machining of aluminium alloys. It can also be used for machining of low-medium alloyed steel.

Property	Unit	
pH(5%)		8.9
Mineral Oil content	%wt	40
Refractometer Factor		1.05

The data mentioned in this product information sheet are meant to enable the reader to orient himself about the properties and possible applications of our products. Although this overview is composed with all possible carefulness on the stated date, the composer does not accept any liability for damages caused by incompleteness and/or inaccuracies in this information, especially when these are caused by obvious typing errors. The terms of delivery of the supplier apply to all product supplies. The reader is advised, especially for critical applications, to make the final product-choice in consultation with the supplier. Due to continual product research and development, the information contained herein is subject to changes without notification. You can download a recent material safety data sheet of this product on our website.
